DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species (1) in the telephone interview on May 31, 2006 is acknowledged.

Claim Rejections - 35 USC § 112

2. Claims 4, 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is rejected because it is unclear what the choices are because of the use of "or" and "and". If "and" is used then the claim should recite "selected from the group consisting of".

Claim 7 is rejected because it is unclear how it further limits claim 3. Is this claim stating that the second amine monomer could be Formulas (1), (2) or (3) and not (4)?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4, 6-10, 13-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brinegar (3,841,492).

Brinegar teaches in columns 7-8 and 17-18, a membrane comprising a solution of a polybenzimidazole polymer having recurring units of the formula where R' is a heterocyclic ring such as a pyridine or a quinoline, etc. in a solvent capable of dissolving the polymer such as dimethyl sulfoxide, etc.

Since Brinegar teaches the same electrolyte having a solid polymer as a base material then inherently the same mole number of material per gram of base material is less than 0.0014 mol. must also be obtained.

In addition, the presently claimed property of mole number of material per gram of base material is less than 0.0014 mol. would have obviously have been present once the Brinegar product is provided. *In re Best*, 195 USPQ 433 (CCPA 1977).

6. Claims 1-9, 13-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schechter et al. "Imidazole and 1-methyl imidazole in phosphoric acid doped polybenzimidazole, electrolyte for fuel cells".

Schechter et al. teaches adding imidazolium salts to PBI/H₃PO₄ membranes.

Art Unit: 1745

Since Schuster et al. teaches the same electrolyte having a solid polymer as a base material then inherently the same mole number of material per gram of base material is less than 0.0014 mol. must also be obtained.

In addition, the presently claimed property of mole number of material per gram of base material is less than 0.0014 mol. would have obviously have been present once the Schechter et al. product is provided. *In re Best*, 195 USPQ 433 (CCPA 1977).

Allowable Subject Matter

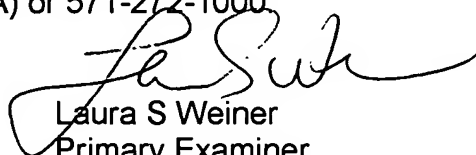

7. Claims 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
